

## The Trusted Name in Background Screening Systems

Current system cost you any business lately? Not connected to the right suppliers? Unable to interface with Applicant Tracking Systems? Challenged by new security requirements? Employees doing tasks the system should do? Transaction fees still taking a bite out of every dollar you earn?

**If the answer to any of these questions is YES, you need BackChecked.**

### Key Features and Benefits:

- On-line ordering and report delivery shorten turn-around.
- Custom pricing, packaging and instructions tailor the on-line experience for each client.
- Real-time order status and notifications keep clients informed.
- Multi-level parent/child rights support multi-location clients.
- Clients and applicants apply legally binding e-signatures.
- Auto-generated consumer letters and a built in compliance manual protect your business.
- Interfaces with key industry suppliers automatically dispatch orders and retrieve results.
- Researcher login integrates smaller, local providers.
- Electronic invoicing saves time and gets you paid faster.
- HR-XML & JSON ease Applicant Tracking interfaces.
- Multiple document upload supports authorization and reporting.
- Applicant Order Entry opens up new business opportunities.
- A flexible workflow engine adapts to your way of doing business to get more done with fewer people.

Secure Internet access for you and your clients

Flexible workflow that adapts to your business
